# Textile Decor That Instantly Warms Up Any Room

## Layer Soft Textures

- Add throw blankets and pillows in knits, velvets, fur, or plush materials
- Mix textures—wool, linen, faux fur, and embroidery—for visual and tactile depth
- Use chunky or woven textiles in contrast to smooth surfaces

## Incorporate Fabric Art & Wall Textiles

- Hang textile wall art, tapestries, or fabric panels to create focal points
- Choose fabric art that also dampens sound in echo-prone spaces
- Use fabric wall hangings that reflect your own story or aesthetic

## Curtains & Rugs with Purpose

- Install heavy or thermal lined curtains to soften light and add warmth
- Use rugs under furniture groups to ground spaces and add texture
- Select rugs with patterns or pile that invite comfort

## Textiles with Color & Pattern

- Use warm earth tones, muted shades, or earthy tones in fabrics
- Mix subtle patterns with solids to balance intrigue without clutter
- Swap seasonal fabrics—lighter hues for warmer months, richer tones for cooler

## Thoughtful Placement & Layering

- Drape throws casually over furniture rather than folding neatly
- Layer pillows in different sizes and fabrics for a relaxed look
- Add textile accents in unexpected places: window seats, corners, behind furniture
